Annual Spring Catalog

COOK SEED CO.,

Waterford, N. Y.

Illustrated Catalog of the Very Best Selected, Tested and Guaranteed Seeds and Bulbs.

Cook's Super Giant Gladioli

The Gladiolus is one of the most decorative plants in the garden, and as a cut flower lends itself to any arrangement.

If the spikes are cut when the lowest flower is in bloom, the others will open in succession and remain fresh a week or ten days. No other flower has gained more rapidly in the public favor than the Gladiolus; this could not well be otherwise, for in addition to the great intrinsic merit of the flower, it is hardy and blooms the first season from bulbs.

Gladioli will thrive in almost any good soil except a stiff clay.

In the autumn, before freezing weather, they should be dug up and the tops allowed to dry down, after which the dry tops, earth and old bulbs can be removed. Store in a cool, dry place, secure from frost until spring planting time.

There is perhaps no flowering bulb of such easy culture, embracing the great range of color with endless combinations and variety, to equal the Gladiolus. Our bulbs are of the finest quality and will give bountiful satisfaction the first season. The bloom is continuous from the end of July until frost. Complete cultural directions with each order.

Be sure to order a good supply and enjoy the beauty of this handsome flower.

Gladioli require full sunlight and are not liable to injury excepting from the use of rank manure.

Plant the bulbs six to nine inches apart, the largest ones four inches and the smaller ones two inches deep. Make an early planting of the smallest bulbs first as soon as the ground is sufficiently dry and warm. Continue to plant at intervals of a week during the spring and early summer; in this way a succession of bloom may be had from midsummer until frost.

A free use of water during the season of active growth and particularly as the buds begin to show is recommended.

This is without any exception the very finest mixture of Gladioli ever put up.

No matter what price you pay you cannot get anything any better, they have been selected for those who wish to have the best to be had.

Cook's Super Giant Gladioli Collection is made up of only the very best giant flowering varieties and includes all colors such as White, Yellow, Shell-Pink, Rose, Fiery Red, Coral-Pink, Orange, Purple and many others. Many of them will grow 4 to 5 feet tall and produce flowers 5 inches or more across.

If you wish a real surprise in Gladioli beauty plant Cook's Super Giant Gladioli.

Resurrection Plant

The Mexican Resurrection Plant is Nature's Greatest Novelty Sometimes called the ROSE OF JERICO. This exceedingly rare and wonderful plant in its dry state, is a shrunken ball of tightly coiled leaves and stems, apparently dead. In this form it will live a hundred years or more. When immersed in tepid water—the leaves unfold, and the whole plant is quickly resurrected and transformed into a rosette of beautiful velvet green both odd and marvelous. It can be resurrected again and again indefinitely—if allowed to curl up dry each time. Do not plant them. The whole plant kingdom cannot show anything so marvelous. Mentioned by Isaiah in the Bible. They yield abundantly in all parts of the U. S. and Canada. Fruit is golden-yellow, size of big cherries, fairly loading the branches down. You have no idea how delicious they are until you try them.

Many call them equal to strawberries to eat out of hand. If left in their husks or pods and stored in a cool place they keep fresh and sweet all winter.

Powell's Prolific Pole Beans.

A Distinct Creation. The Wonder and Admiration of all Bean Growers. Our Own Introduction. This Bean Has Not an Equal in the World. We Offer Headquarters Stock.

Genuine Selected Seed, Packet Only 15 Cts. 2 for 25 Cts. 5 for 60 Cts. 10 for \$1.00

Powell's Prolific Pole Beans are a Stringless Snap bean of the highest quality. They are rich, tender and buttery to a superlative degree. Their distinct flavor cannot be described. They most melt in your mouth. Thousands have declared they are the VERY BEST of all Beans and they are equally as good as a dried bean for winter use.

The vines are marvelous runners—producing almost solid masses of thick pods 5 to 6 inches long—hanging in enormous clusters from top to bottom of the poles. They are everlasting bearers continuing up to hard frost. The beans remain in luscious condition for a long time.

They are absolutely unlike all other beans. They will positively yield 3 times as much as the best of the old sorts. They're money makers.

With every order for Powell's Prolific Pole Beans this year we are going to send out a few beans for a trial, of one of the largest pole beans grown, and its something new and alone is worth more than 15 cts. Better try it.

HIGH PRAISE FROM MY CUSTOMERS.

Powell Beans Worth \$10. a Pkt.

Mr. A. T. COOK, Dear Friend:—I have grown every bean known in this country, and from experience consider Powell's Prolific KING. It is the most luxurious grower, the most prolific bearer, the most delicious when young—tender—stringless, and delightful in pickles. For baking there never was such another bean. I would give \$10.00 for a Packet, rather than be without them.

For 16 years I have used your seeds; they have always grown without exception. They have no superior, are always as represented. I have tried the other houses, but none of their seeds grow and produce like yours. You are welcome to use this letter. Hiram Whinnery, Findlay, Ohio.

PROF. H. WHINNERY.

Received \$5. From 4 Hills--Used Many Too.

There is much money in Powell Beans. I sold \$5. worth from 4 hills (2 plants in a hill) besides all I could use in my family. They are wonderful, and continue bearing until frost. J. P. Smith, Va.

Over One Bushel of Beans From Every Hill.

For 15 years I have grown beans. None can compare with Powell's. I planted 18 hills—picked over a bushel from each—and sold \$9.98 worth for cash. Samuel Waddy, Henry Co., Tenn.

Cannot Over-Recommend This Money Maker.

From 16 hills I sold \$7.65 worth and ate of them all the season. You cannot over-recommend this money-maker. I had to prop up nearly every pole. A. J. Packard, York Co., Maine.

JUST THINK ABOUT THIS YIELD.

Delaware College Agricultural Experiment Station report the following are the results of the yield tests on the Powell Pole Beans as compared to Horticultural. Yields: Powell's Prolific, 17,696 lbs. Pole Horticultural, 5,088 lbs. per acre. Very truly yours, C. A. McCue, Horticulturist.

Only think of it—Powell's 3½ times as productive as the Horticultural—which is noted as a very big yielder.

John C. Foster, Wash. Co. N. Y. from 30 packets grew 45 lbs. of shelled beans. This is a bumper crop

Cook's Super Giant Gladioli

per 100.

The Gladiolus is one of the most decorative Plants in the garden, and as a cut flower lends itself to any arrangement.

If the spikes are cut when the lowest flower is in bloom, the others will open in succession and remain fresh a week or ten days. No other flower has gained more rapidly in the public favor than the Gladiolus; this could not well be otherwise, for in addition to the great intrinsic merit of the flower, it is hardy and blooms the first season from bulbs.

In the autumn, before freezing weather they should be dug up and the tops allowed to dry down, after which the dry tops, earth and old bulbs can be removed. Store in a cool, dry place, secure from frost until spring planting time.

There is perhaps no flowering bulb of such easy culture, embracing the great range of color with endless combinations and variety, to equal the Gladiolus. Our bulbs are of the finest quality and will give bountiful satisfaction the first season. The bloom is continuous from the end of July until frost. Complete cultural directions with each order.

Be sure to order a good supply and enjoy the beauty of this handsome flower.

No matter what price you pay you cannot get anything any better, they have been selected for those who wish to have the best to be had.

Cook's Super Giant Gladioli Collection is made up of only the very best giant flowering varieties and includes all colors such as White, Yellow, Shell-Pink, Rose, Fiery Red, Coral-Pink, Orange, Purple and many others. Many of them will grow 4 to 5 feet tall and produce flowers 5 inches or more across.

If you wish a real surprise in Gladioli beauty plant Cook's Super Giant Gladioli.

This is without any exception the very finest mixture of Gladioli ever put up.

Gladioli require full sunlight and are not liable to injury excepting from the use of rank manure.

Plant the bulbs six to nine inches apart, the largest ones four inches and the smaller ones two inches deep. Make an early planting of the smallest bulbs first as soon as the ground is sufficiently dry and warm. Continue to plant at intervals of a week during the spring and early summer; in this way a succession of bloom may be had from midsummer until frost.

STRAWBERRIES FOR 5 MONTHS. "NEW EVERBEARING."

Earliest, Hardest, Most Delicious, Most Productive of All.

THESE NEW Everbearing Strawberries are so wonderful, so extraordinary—the plain truth about them almost surpasses belief. They stand alone, the greatest of plant marvels. Planters everywhere concede this. They cannot praise them enough.

Grow THESE and you can have bushels of delicious berries for 5 whole months—strawberries for breakfast, dinner, and supper—Strawberry shortcake galore, and lots of fruit and plants to sell at fancy prices.

SPRING SET PLANTS will be loaded with fine berries within 3 months and bear enormously from July till way in November. Indeed I have picked ripe berries late as Dec. 8, and many green ones and blossoms still on. This after many hard freezes proves their amazing hardiness.

I HAVE a large Photo of one plant taken Oct. 15 that had 40 big ripe berries on it, 69 green ones and lots of bloom. Hundreds and hundreds more were just about as good, and remember these very plants had been bearing continually since July. Need I say more? I have tried many of the so called "everbearing strawberries" but all are worthless in comparison with this splendid variety.

PRICE. EXTRA STRONG PLANTS pure and true 12 for 90 cts. 25 for \$1.50. 50 for \$2.50. 100 for \$4.00. All carefully packed, boxed, postpaid and insured. Price includes Premiums as offered. If no Prem. is wanted, deduct one third. Order at once—will send plants in early spring.

An Independent Laborer--Thanks Horseradish.

FROM A DAY LABORER TO A SUCCESSFUL BUSINESS MAN IN FOUR YEARS.

Rent or lease an acre of land, if you don't own a good sized garden. Acquire a few hundred horseradish plants. Set out the plants, and wait a few months, harvest the crop, grind and bottle, and then repeat the process. By the end of the second year you should be doing well, financially, and by the end of the fourth year you should be a person of independence, if the record of Andrew Miller can be taken as an example.

Four years ago Miller was a day laborer. To-day he owns and operates a business which totaled more than twenty thousand dollars in sales last year.

It is highly improbable, however, that everyone can take the above recipe and make a fortune. For the given ingredients require mixing with much hard work, especially at the beginning of the process, and not everyone is willing to devote the amount of labor and energy Miller expended to gain his start. Also, few people would select horseradish in its native state as a foundation for fortune.

That Miller selected horseradish as the foundation on which to build a twenty-thousand-dollar-a-year business shows he is a man not afraid to step out of the beaten path.

At the time Miller started in the horse-radish business he knew little or nothing about it. A neighbor of his, an elderly man, had for years raised a little horseradish, ground the roots and sold it in the neighborhood. In the spring this neighbor asked Miller to set out a few plants in the ground back of his house and sell them to him in the fall. This set Miller to thinking, and instead of planting a few roots he bought fifteen hundred and set them all out. Miller was working as a carpenter, at the prevailing union wages. Work is not always plentiful for carpenters in the winter, and he thought if work grew scarce the coming winter he would grind some of the roots and try selling the finished product.

Early in the fall he started, his seventeen-year-old daughter acting as saleswoman. Every night after a hard day's work at his trade, Miller would work till midnight in the cellar of his home grinding and bottling horseradish. His daughter was able to dispose of a few bottles every evening, and within a few weeks her daily sales averaged more than a dozen bottles.

The girl could sell the horseradish only after school hours; and Miller began tucking a few bottles in his coat pockets to sell to his fellow workmen. In his spare hours in the evening he tried peddling his product in districts his daughter did not reach.

In this way, bottle by bottle, the business gained its start. One evening, a few months after the first bottle was sold, Miller counted the day's sales and found that he had more than ten dollars. The next day he left the carpenter's trade, and expects that he will never have to return to it.

An income of ten dollars a day looked big to him, and he began working harder than ever. Up to this time he had been grinding the roots in an old coffee mill. He saw that if he was to remain in the business he must have a quicker method of grinding, and he invested in an electrically operated grinder. This offered him a chance to take things easier, if he desired, for the electric grinder could dispose of twice the number of roots in half the time it took with the coffee mill. But Miller did not choose to shorten his working hours. He merely employed the new machine to grind as many roots as could be pushed thru it in the same length of time he had been grinding by hand. He still worked half the night grinding and bottling, to have the days free for selling.

With the increased output Miller started after the grocers' horseradish business, and he got it in a characteristic way. Miller persuaded them to allow him to leave a dozen bottles at each place he visited,

with the understanding that if they did not sell they were not to be paid for. No grocer could reasonably deny him under the condition. Miller had faith in his work.

And this faith was justified. Miller knew freshly ground horseradish was better than that which had been ground and bottled for months, or even years. Buyers knew it, too, and it was not long before the grocers who refused to buy the new brand were insisting on having larger supplies. To-day Miller's horseradish out sells any other brand in practically all of the stores in every town and city within a radius of thirty-five miles of his home town.

When Miller started peddling horseradish he used a horse and buggy and covered only a few miles every day. Now he has three auto trucks on scheduled routes, covering several counties.

From his sales of two or three bottles an evening Miller's business has grown until his average daily sales are over six hundred bottles. He began by buying bottles in dozen lots. Now he orders them in carload lots. He thought he was well off the day his sales totaled ten dollars. His average weekly sales last year were four hundred dollars.

Of course this is not an enormous business as big business is considered. But it is practically a one-man business, grown from nothing in four years. It is done without a factory. Miller still grinds the roots in the same place as four years ago—on his back porch—and he still has it bottled in his cellar. He employs two men for this work now.

Four years ago Miller was not certain where the next month's rent could be earned. Now, his venture has so prospered that he and his family are able to spend several weeks each summer seeing America, with the aid of a pleasure car—*William Bruce Hart in July American Magazine.*

Cook's Frost Proof Cabbage Plants

Will Double Your Profits. Why?

BECAUSE THEY MATURE HEADS WHICH CAN BE MARKETED TWO OR THREE WEEKS EARLIER THAN HOME GROWN PLANTS AND YOU GET EARLY MARKET PRICES FOR YOUR CROP WHICH MEANS MORE MONEY.

Our plants are grown from the best strains of seed, in the South along the Sea Coast of South Carolina, where the soil and climatic conditions are just suited for growing Tough, Hardy, Frost Proof Cabbage Plants. Plants are ready for shipment when from eight to ten weeks old, the buds are then purple and the outer leaves a reddish brown; when in this condition they can be shipped to territory farther North and planted in the open ground a month to six weeks earlier than home grown hot bed or cold frame plants. The top of the plant does not grow until your regular weather opens up, but the roots grow from the time the plants are set. They have stood a temperature of eight to ten degrees above zero without injury; the land freezing or the plants being covered with ice, sleet and snow did not affect them. Headed Cabbage is ready ten days to three weeks earlier by using our plants than by using home grown plants. Frost Proof Cabbage Plants may be shipped to any point where they will arrive within four or five days by parcel post, and should be planted four to six weeks earlier than home grown plants. The plants will be somewhat wilted and have a hard stunted appearance when received, which will be disappointing to persons who have never used them before. Regardless of their appearance, however, they will produce the results you want, which is Extra Early Cabbage.

Order Early and state about what date you wish your plants sent. We will ship just as near the time desired as weather and other conditions permit.

To get the full advantage of these Frost Proof Cabbage Plants they should be planted a month or six weeks earlier than you would plant home grown plants. We fill orders from December 1st to May 1st. Be sure and tell us when to ship them. Please remember that

When we receive your order for these plants, we forward it to our Southern growing stations which takes a couple of days, and the plants are shipped direct to you from our growing station. Plants cannot be dug or shipped when buds are wet. We sometimes have a week or ten days of continued wet weather which prevents shipment. Dear Friends:—I offer you these remarkable Potatoes because I honestly believe them decidedly the BEST IN THE WORLD. Their incomparable table qualities, extraordinary earliness, enormous productiveness and beauty, make them indispensable to every Home Garden. When raised for market, their easy-growing and easy-selling qualities render them a money-maker beyond compare.

I have been an enthusiastic grower of fine Potatoes—multitudes of them—for over 30 years and can truthfully say I never found their equal—or anything near it, in traits that go to make a perfect potato.

I want you to try them. It will be many dollars in your pocket—and comfort in your home. I want you to grow a year's supply for your own table—and enough over to plant, and bring you in a snug little fortune.

You can hardly imagine how good and how early they are. Grow them once and you will grow them always. Read Testimonials on another page. I could fill my entire catalog with such as these.

I need only add, the Early Six Weeks are unusually healthy, hardy and vigorous; grow so quickly enemies trouble little. Tubers are very smooth, slightly pink, and always cook dry, sweet and floury. They are the very best of keepers, remaining hard and plump, and retain their matchless flavor clear up to July.

Hundreds have testified they have positively produced fine eating potatoes six weeks from planting.

Beware of spurious seed. Thousands have suffered. Get the genuine, pure and true. Grown in the north where WHOLE FIELDS with ordinary culture averaged OVER 250 BUSHELS per acre of handsomest, cleanest potatoes you ever saw. THIS is the hardy stock I offer you. Don't plant old, run-out sorts. You lose dollars every time. Grow this money maker and sell seed to your neighbors at a big profit. Give your boy and girl a chance to make money also—and win a Prize Watch. It will pay in more ways than one.

TWO CROPS OF POTATOES A YEAR EASILY GROWN IN THE NORTH.

My EARLY SIX WEEKS grow so quickly you can grow two full crops a year on the same ground, even in the far north. This is a feature of tremendous value. It is worth BIG MONEY to every planter. Only think of it! You can double your crops and profits at a trifling cost. I send full instructions how to do it. Please show this to all wide-awake potato growers.

I give valuable seed Novelties with every order.
